

We find that $\sqrt{288369} = 537$.

Example 1.25

Find the square root of 459684 by long division method.

Solution:

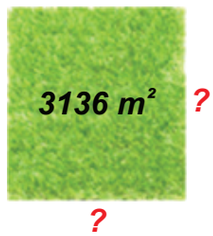

By long division method, we can find the square root of 459684 as given below:

$\therefore \sqrt{459684} = 678$

Example 1.26

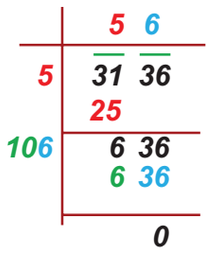

The area of a square field is 3136 m^2. Find its perimeter.

Solution:

Given that the area of the square field = 3136 m^2.

$\therefore$ The side of square field = $\sqrt{3136}$ = 56 m

$\therefore$ The perimeter of the square field = 4 × side

= 4 × 56

= 224 m
