2. Find the area of the shaded part in the following figures. ($\pi = 3.14$)

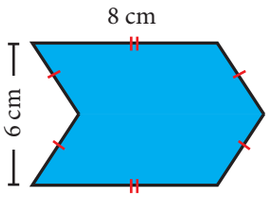

(i)

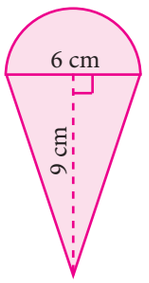

(ii)

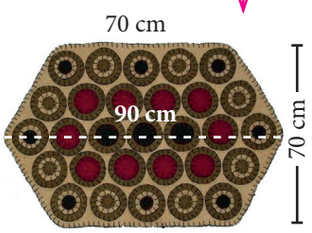

3. Find the area of the combined figure given which is got by the joining of two parallelograms.

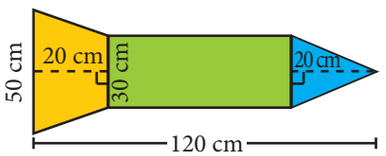

4. Find the area of the combined figure given, formed by joining a semicircle of diameter 6 *cm* with a triangle of base 6 *cm* and height 9 *cm*. ($\pi = 3.14$)

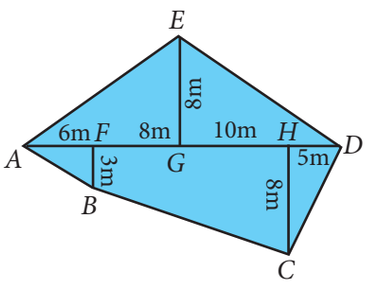

5. The door mat which is hexagonal in shape has the following measures as given in the figure. Find its area.

6. A rocket drawing has the measures as given in the figure. Find its area.

7. Find the area of the irregular polygon shaped fields given below.

2.4 Three dimensional (3-D) shapes

Trace the outline of a ₹ 2 coin, ₹ 10 note and a square shaped biscuit on a paper.
