- Virus show both living and non living characteristics.
- Bacteria is a prokaryotic, single celled organism.
- Fungi is a eukaryotic, non-photosynthetic, spore-forming organism. They range from single celled organisms to very complex multicellular organisms.
- Algae is a single-celled or multicellular eukaryotic, photosynthetic organism.
- Protozoa is a eukaryotic, single celled organism that usually lacks chlorophyll.

A-Z GLOSSARY

Antibiotic	A chemical that kills or inhibits the growth of micro organism and is used to treat infections.
Bacteria	A prokaryotic, single celled organism.
Capsid	The protein coat surrounding a virus.
Fermentation	Conversion of organic compounds such as carbohydrate into simpler substances by microbes, usually under anaerobic conditions (with no oxygen present).
Hyphae	A very fine thread that is the basic structure of fungi.
Microorganism	A small living thing which includes bacteria, protozoa, algae, fungi and viruses.
Pathogen	An organism that causes disease.
Vaccine	A special type of medicine that is given to both people and animals to artificially increase immunity to a particular disease and to prevent an infectious disease from developing.

TEXTBOOK EXERCISES

1TSVQ

I. Choose the best answer.

1. Microorganisms are measured in _____.
   a) cm b) mm c) micron d) meter.
2. _____ shows both living and nonliving characteristics.
   a) Protozoa b) Virus c) Bacteria d) Fungi
3. _____ is a prokaryotic microorganisms.
   a) Virus b) Algae c) Fungi d) Bacteria
4. Based on shape, the bacteria are classified into _____ types.
   a) two b) three c) four d) five
5. Common cold in human is caused by _____.
   a) plasmodium b) influenza
   c) vibrio cholera d) aphthovirus

II. Fill in the blanks.

1. _____ is prepared from a mould called penicillium.
2. _____ are the infectious protein particles.
3. The infecting virus particle found outside the host cell is _____.
4. Microorganism can be seen with the help of a _____.
5. Bacteria, which has a flagellum at one end is classified as _____.

III. State true or false. If false, correct the statement.

1. Disease causing microorganisms are called pathogens.
