

Aligarh Muslim University and Sir Syed Ahmad Khan

language. It was at this time Sir Syed Ahmad Khan established Muhammadan-Anglo School (1875) at Aligarh which ultimately developed into the Muslim University of Aligarh (1920). By the second decade of twentieth century universities had come up in prominent cities, following Sadler Commission Report (1917). There were unitary and residential universities started thanks to the initiatives taken by the philanthropists. The notable example is Jamsetji Tata's Indian Institute of Science (1909), Bengaluru. In Madras, the Pachaiyappa's School named after a dubash of the 18th century came up in 1845, which was later upgraded to a college in 1880.In Tamil Nadu Annamalai University was established in 1929.

Spread of Education

Notwithstanding the colleges and universities education continued to be the preserve of the upper and middle classes. Gandhiji came up with Wardha educational scheme aimed at imparting elementary education through some craft along with the basics. It was hoped that children would produce enough to pay the cost of their education and make possible the introduction of free and compulsory education. However the Hunter Commission's recommendation of fixing the responsibility of providing primary education with local and municipal governments became possible when Dyarchy was in operation in provinces (1921-1937). The Sargent Commission's Scheme (1944) of introducing free and compulsory education for all Indian children in the 6-11 years age group had to await independence for its implementation.

Education in Independent India

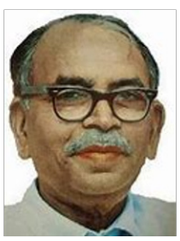

In 1951 only 18.3 % of people were literate. The male literacy was 27.2 % while female literacy rate was 8.9. In 1950-51 there were two lakh students on rolls in Institution of higher learning. There were 58 universities when University Grants Commission was set up in 1956 to maintain standards in higher education. The national government appointed the Dr. Radhakrishnan Commission (1948), the Secondary Education Commission under the chairmanship of Dr. Lakshmanaswami Mudaliyar (1952-'53), and the Kothari Commission (1964) suggested measures for modernisation of Education system in the country.
